

N.S.PRO 850GH neo

What is N.S.PRO 850GH neo?

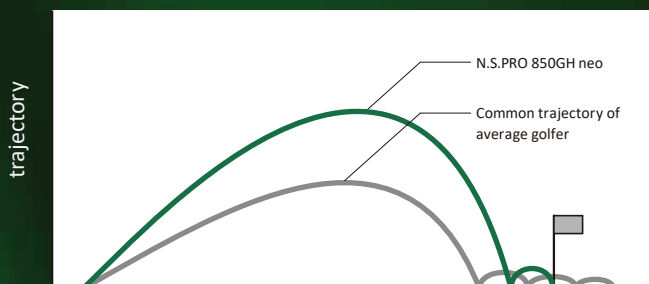

The new N.S.PRO 850GH neo was developed to maximize the performance of the larger and stronger lofted modern iron head designs to promote a higher trajectory and spin rate.

With our unique MSA (Multi Shape Adjustment) technology cultivated over many years, N.S.PRO 850GH neo is the result of our focus to create the perfect "iron club".
