The Putter Stand – Keeping your Grips Dry

Tired of wet, grassy grips? Ready to extend the life of your grips? Sick of big bulky attachments?

Do you ever golf in the early morning when the greens are still wet with the morning dew? It is one of the best times to golf, except when you end up short of the green and you need to bring two clubs with you. So, what do you do with your putter while you are chipping, and what do you do with your wedge, while you are putting? You don't want those grips to get WET!! Do you stick a tee or divot repair tool in the ground, assuming you haven't forgotten them in your bag? What a hassle to reach into your pocket, find the tool of choice, bend over, place it in the ground, and then hope you can balance your club on it!

Imagine if you can take care of all of that with the flip of your thumb! With a Putter Stand on your putter and a Wedge Stand on all your wedges, life gets a lot easier. The Putter Stand and Wedge Stand are designed to have a low profile fit to your clubs so they are barely noticeable and out of the way in the closed position. Flip them open and you have a kickstand for your club! The Putter Stand also comes with a ball marker (magnetically held in place)... one less thing you need to carry in your pocket!

Developed by two golfers, Hayes Freeman and Daniel Poston, the Putter Stand is available in 2 different sizes that fit almost any size and style grip. The avid golfers established HD Products and expanded the product line to include the Wedge Stand, which will fit almost any club in your bag. The Putter Stand and Wedge Stand are MADE IN THE U.S.A. and manufactured in Plainfield, Illinois.

Made from an engineering grade plastic, these products are durable while still being light weight, giving you a light weight, long lasting product.

The Putter Stand and Wedge Stand make the perfect individual or corporate gift and are ideal as a tee prize, tournament favor, or goody bag gift.

Putter Stands and Wedge Stands are available online at www.HDProductsinc.com

Additional Short plugs
